

RTV Tools PDF Creator 2.2 Configuration/Profile Settings

Printing to PDF automatically from Autodesk Revit with RTV Tools (Xporter/Xporter PRO/Drawing Manager) and PDF Creator (version 2.2) can be easily enabled with the below settings. For more help and assistance with our software, please visit our training and help website here: <http://help.rtvtools.com/>

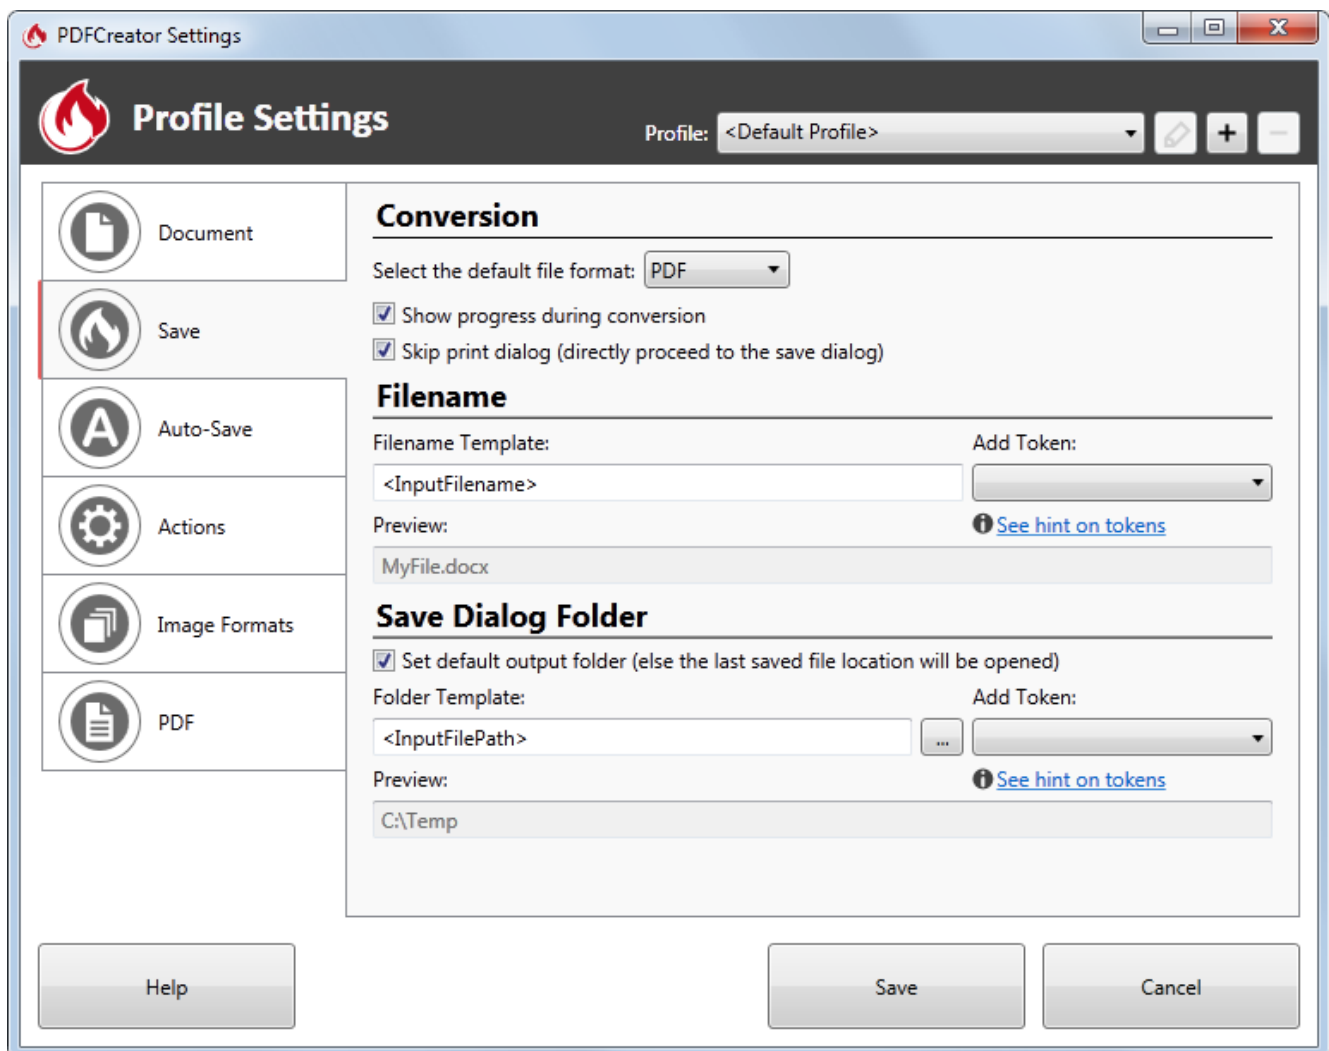

Document (Tab) Settings

The screenshot shows the 'Profile Settings' window for PDFCreator. The window title is 'PDFCreator Settings'. The main title is 'Profile Settings' with a sub-title 'Profile: <Default Profile>'. On the left, there is a sidebar with icons for 'Document', 'Save', 'Auto-Save', 'Actions', 'Image Formats', and 'PDF'. The 'Document' tab is selected. The main area is divided into three sections: 'Title and Author Templates', 'Stamp', and 'Image Formats'. The 'Title and Author Templates' section has fields for 'Title' (set to '<PrintJobName>'), 'Add Token' (dropdown), 'Preview' (set to 'Title from Printjob'), 'Author' (set to '<PrintJobAuthor>'), 'Add Token' (dropdown), and 'Preview' (set to 'Jason'). The 'Stamp' section has a checkbox 'Add a stamp text on top of all pages' (unchecked), 'Stamp Text' (set to 'Confidential'), 'Font' (set to 'Arial 48pt'), 'Font Color' (color picker), and a checkbox 'Show Font as outline - Outline Width: 2' (checked). At the bottom, there are 'Help', 'Save', and 'Cancel' buttons.

No changes required (*optional*)

Save (Tab) Settings

Check/Tick **Show progress during conversion**

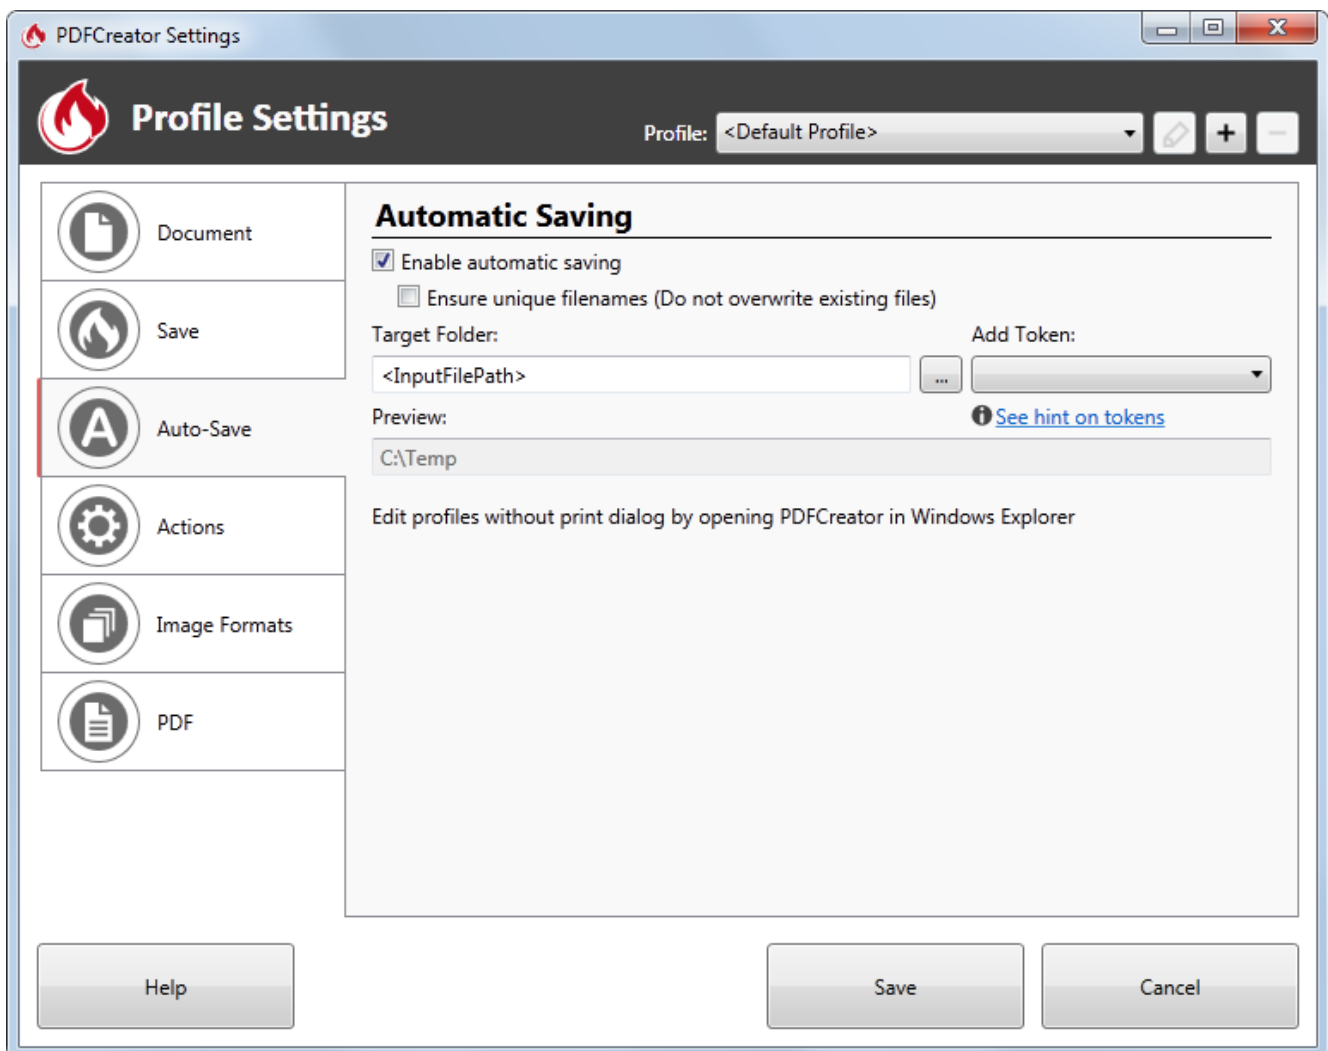

Check/Tick **Skip print dialog (directly proceed to the save dialog)**

Add Token **<InputFilename>**

Check/Tick **Set default output folder (else the last saved location will be opened)**

Add Token **<InputFilePath>**
